

Garmin Nuvi 680 Antenna Replacement

A step-by-step guide to replacing the antenna in the Garmin Nuvi 680.

Written By: Chris Marzano

INTRODUCTION

A step-by-step guide to replacing the antenna in the Garmin Nuvi 680.

TOOLS:

- [iFixit Opening Tools](#) (1)
 - [Spudger](#) (1)
 - [T5 Torx Screwdriver](#) (1)
-

Step 1 — Outer Case

- Flip open the antenna on the back of the device.
- Remove the two screws on the antenna cover using a T5 Torx screwdriver.
- These screws are 4.42 mm long.

Step 2

- Remove the antenna cover.

Step 3

 The yellow wire is connected to the motherboard, so you cannot disconnect it until you finish opening the device.

- Pull the antenna circuit board out of its case.

Step 4

- Insert the pointed end of a spudger into the leftmost slit of the antenna case.
- Push the spudger to the right.

⚠ Slide the antenna case out slowly or you may lose the antenna's spring. The spring is inside the black plastic that holds the antenna case to the device.

- Slide the antenna case out of the device.
- 🔧 Reinstallation tip: first reassemble the antenna casing (place antenna back into its plastic cover), and then re-insert the entire assembly back into the GPS body.

Step 5

- Remove the two screws on the back of the outer case using a T5 Torx screwdriver.
- These screws are 10.82 mm long.

Step 6

 Gently pull apart the front and back of the device. The front and back are still connected by ribbon cables.

- Starting along the top, separate the front and back of the device by pushing an iPod-opening tool into the crack along each side of the case.

Step 7 — Antenna

- Use a spudger to disconnect the yellow antenna wire from the ZIF connector on the back of the motherboard.
- Remove the antenna.

To reassemble your device, follow these instructions in reverse order.
